important feature of a set is that its elements are "distinct" or "uniquely identifiable." A set is typically expressed by curly braces, enclosing its elements. If  $A$  is a set and  $a$  is an element of it, we write  $a \in A$ . The fact that  $a$  is not an element of  $A$  is written as  $a \notin A$ . For instance, if  $A$  is the set  $\{1, 4, 9, 16\}$ , then  $1 \in A$ ;  $4 \in A$ ;  $9 \in A$  and  $16 \in A$ .
